PROFESSIONAL SUMMARY

Software engineer with 4+ years at NCS across enterprise application development, API integration and HR systems delivery. Experience spans feature development, UAT, production deployments and application support. Coordinated requirements and rollout activities for a 53-mission HR programme, with 23 mission deployments completed, and contributed to an multi-agent recruitment prototype.

PROFESSIONAL EXPERIENCE

NCS Pte. Ltd. | Singapore

Jan 2022 - Present

AI Software Engineer | Apr 2026 - Present

Software Engineer | Jan 2022 - Mar 2026

- Selected contributions across NCS assignments
- Application engineering & software delivery
- Delivered feature enhancements and defect fixes for an internal enterprise application, supporting ongoing maintenance and day-to-day use.
- Authored test scripts and conducted user acceptance testing (UAT) to check application changes against user needs before release.
- Deployed application releases to UAT and production servers; resolved user-reported issues, answered queries and provided post-release application support.
- API integration & internal HR operations
- Worked on an API endpoint for an existing public-sector website, intended to support the existing and replacement platforms in parallel during system migration.
- Maintained internal HR SharePoint lists supporting officer onboarding and offboarding.
- HR leave management | Business analysis & rollout
- Coordinated business analysis and rollout activities for an HR leave-management programme spanning 53 overseas missions, with deployment completed for 23 missions.
- Gathered mission-specific employee data, public holidays, leave types, balances, entitlements and approval workflows for locally recruited staff (LRS).
- Consolidated staff data and leave requirements into five Excel configuration sheets per mission and submitted these to the vendor for system setup.
- Conducted system demonstrations to support mission buy-in; coordinated testing and end-to-end walkthroughs so mission representatives could guide LRS onboarding.
- Supported go-live through manual account resets, then assisted missions with issue resolution, LRS onboarding/offboarding and ongoing guidance on system use.
- HireWise-**AI** | **AI** agents & agentic workflows (prototype)
- Contributed to agentic application development in Python/FastAPI, combining **LLM**-powered **AI** agents, rule-based matching and human-review workflows for recruitment.
- Prototype workflows coordinate job analysis, resume extraction, matching and review escalation, with optional LangGraph orchestration, agent routing and SQLite checkpointing.
- Leadership: NCS Young Leaders; Brand Ambassador.

EDUCATION

Singapore Management University

2017 - 2022

BSc Information Systems (Cyber Security)

Nanyang Polytechnic

2014 - 2017

EARLIER EXPERIENCE

Singapore Management University

Research Assistant

Dec 2021

- Evaluated 88 IS216 projects using OWASP ZAP, commercial DAST tools and static analysis; findings supported peer-reviewed research on security in web programming education.

Alpha Ori Technologies

Maritime Tech Solutions Intern

May - Jul 2020

- Automated conversion of 150M+ rows containing 3B+ data points into AWS DynamoDB using C#/.NET, JSON and ETL workflows.
- Built API proof-of-concepts for 3 vendors and implemented data sorting and voyage analysis to evaluate technical fit and operational trends.

OSM Thome

IT Intern

May - Oct 2018

- Formerly Thome Ship Management
- Built an analytics portal presenting 15 decision data points, a ship-agency workflow supporting 160+ emails/hour, and API enrichments covering 230+ vessels.

Rightspot

Intern

Jul - Oct 2016

- Resolved 20+ bugs in 2 weeks; built applicant-status and job-listing dashboards covering 250 applicants and 500+ companies.

TECHNICAL SKILLS

Languages & frameworks:	C#/.NET, ASP.NET, Python, SQL.
Data & integration:	API integration, ETL, AWS DynamoDB.
AI & agentic systems:	Prompt engineering, tool calling, multi-agent orchestration, human review.
Delivery & security:	UAT, test scripting, UAT/production deployments, application support, OWASP ZAP, static and dynamic analysis.
Business analysis:	Requirements elicitation, workflow mapping, vendor coordination, user training, Excel, SharePoint.
Project-based tools:	TypeScript/Node.js, Next.js/React, PostgreSQL/Prisma, Docker, GitHub Actions, Vitest, Playwright.
Agentic development:	Claude Code, Codex, Kiro CLI; reusable prompts/skills and output validation.

PUBLICATION

XSS for the Masses: Integrating Security in a Web Programming Course using a Security Scanner - ITiCSE 2022; co-author; nominated for Best Paper Award.
